Essence by Aetrex offers an uncompromised merger of fashion, comfort and customization. Created by renowned footwear designer Susan Ryder, Essence comes in various collections to allow you to look and feel your best for any occasion.

The exciting collection of Essence Pumps and Sandals provides extraordinary comfort and support without compromising on the highest fashion standards. Feel like you’re in your favorite pair of sneakers while wearing a stylish pair of Essence Loafers that provide unmatched cushioning and functionality. Or stay on top of the latest winter fashion trends with a pair of chic Essence soft napa leather boots.

Essence by Aetrex are made from luxuriously soft full-grain leathers and moisture transferring polyester linings. Most Essence styles also feature Aetrex’s IQ150 memory foam footbeds and built-in Lynco support for an unmatched comfort experience. Just don’t forget to take them off after a long day on your feet.

healthy, light & yummy™

Excuse the pun, but we’ve really “stretched our imagination to the limit.” Berries by Aetrex combine fashion and fun with extraordinary comfort. Finally a shoe that gently conforms to your foot, without any pressure or discomfort. Casual enough to slip on when you’re in a hurry, but stylish enough to make a statement. Footwear so soft and light that you won’t want to take them off after a long day on your feet.

Berries are made by blending breathable IQ150 memory foam and colorful 4-way stretch fabrics. Stylish leather accents and stitching are added for an extra element of style and sophistication. And to complete the package, all Berries feature removable memory foam footbeds to ensure 360 degrees of customized comfort for the ultimate footwear experience.
Neoprene linings stretch comfortably & insulate to keep feet warm and dry

Sandalistas are the first sandals perfectly designed for you. To start, the footbed is anatomically shaped and contoured to match the foot and eliminate pressure and friction.

Sandalistas proudly feature built-in Lynco® support to incorporate the benefits of the world’s most successful foot orthotic system. Instead of using firm materials, Sandalistas are made with IQ150™ Memory Foam that conforms to your specific gait pattern and ensures an equal distribution of pressure while you walk. In addition, all styles incorporate unique adjustability features, enabling you to customize the fit to your particular needs.

Sandalistas are available in two distinct collections – Cork Comfort and Customized Comfort. The Cork Comfort collection merges the benefits of Lynco support with the light-weight, shock absorbing properties of cork and EVA. The Customized Comfort collection incorporates Aetrex’s patented Mozaic Customization Technology to allow you to immediately customize your Sandalistas for the ultimate in personalized comfort and performance.
Sandalistas™
cork comfort collection

When we set out to design our first collection of toning shoes, we assembled a team of fitness experts, doctors and pedorthists to create the ultimate footwear for your health and wellness. Shoes to help transfer pressure and stress away from your feet towards areas of your body that benefit from stimulation such as your calves, hamstrings and gluteal folds.

We’re proud to introduce Aetrex BodyWorks Footwear. BodyWorks help tone your lower body, encourage healthy midfoot walking and promote proper body alignment.

These exceptional shoes feature an innovative double rocker sole to redistribute force away from both your rearfoot and metatarsal heads. The net result is shoes that help make you look and feel your best and provide an extraordinary footwear experience.
SPORT LACE

Warning: Don’t try them, unless you’re prepared to wear them

To create the ultimate hybrid of extreme comfort and everyday performance, we had to ignore many conventional shoe design theories. And maybe that’s why Modpods look different and feel different than all other shoes.

Modpods’ unique floating pods keep the shoes airy light and dispense shock to create a floating sensation as you walk. The uppers are made from innovative 4-way stretch fabrics and soft memory foams to provide a customizing, comfortable hug for your feet. And the patented, Lockdown™ Heel Strap allows you to quickly slip the shoes on and off and customize the stability to your desire.

So proceed cautiously, and think it through before trying them on. Because you may not want to ever take them off again.
MODPOD CLOGS
- Comfortable clog design for easy on/off wear

- Innovative floating pod design for lightness and shock disbursement
- Four way stretch uppers for optimum fit

The Miracle of the Chilean Miners & their Copper Sock Connection

The entire world watched, riveted by the news of the 33 Chilean miners trapped underground for 69 days struggling to survive. They were trapped in an ideal environment for the development of fungi and bacteria. 36 days after being trapped, all miners received socks containing copper ion technology developed by Cupron®. After wearing the Copper socks, their skin conditions showed remarkable improvement. All the miners emerged from this ordeal with feet that were clean and free of odor-causing fungus despite the damp and humid living conditions.

Aetrex Socks, with Copper Sole™ Technology, are unsurpassed in comfort, performance, and protection. Copper Sole™ Technology has been lab tested and clinically proven to help prevent bacteria, fungi, and odor, as well as improve skin texture and appearance. Copper ions, embedded in the yarn and guaranteed to last for the life of the sock, provide superior protection and help eliminate 99.9% of bacteria, fungi and odors in the sock.

- Copper is the only natural element that plays a vital role in collagen formation, a connective tissue in the skin.
- Only copper socks rejuvenate the skin and improve texture and appearance.
- Hand-linked flat toe seams for extra comfort and helps protect those with diabetes.
- Advanced Moisture-Guard™ wicking system, keeps the foot healthy, cool and dry.

NON-BINDING
- Non-binding yarn with spandex hugs leg without restriction
- Hand linked smooth toe seam for extra protection
- Extra cushioning option for superior comfort & shock absorption
- Doctor recommended for diabetes
